

 Duo Security is now part of Cisco.

Managed Service Provider Program

Easy to Buy, Easy to Manage, Easy to Grow.

According to the 2017 Verizon Data Breach Investigations Report, 81% of hacking-related breaches leveraged either stolen and/or weak passwords, yet most Managed Service Providers (MSP) fail to apply discipline and accountability over user identity and device health before they connect to the customer's applications. The problem: There is no flexible, easy to use, MSP-enabled multi-factor authentication (MFA) solution available to secure cloud and BYOD environments, leaving a gap in coverage for MSPs to provide a robust, secure solution to their customers.

Duo's MSP Program delivers security solutions that are simple to set up and can easily scale with your business as a service.

We chose Duo Security based on our experience after evaluating the other two-factor authentication solutions out there, and it's been a great experience all along."

David Howard

VP of Business Development
NetWorks Group

The Duo Managed Service Provider (MSP) Program enables partners to use Duo's cloud-based, multi-tenant architecture to secure your customer's environments within minutes, with no physical agents to deploy. Through this initiative, partners can ensure that only trusted users and trusted devices may access protected applications.

Program benefits

- Deploy without ordering
- Consolidated billing
- Multi-tenant management console
- Excellent documentation and support
- Assessments and tools
- Sales support

With this integrated offering, MSP partners have a foundation to grow their security services profitably.

Trusted Users
Users really are who they say they are.

Secure Devices
Each device meets your security standards.

Every Application
Access to every application is secure.

Duo's MSP Program

Key Features

Flexible Billing

Deploy multi-factor authentication and confirm the identity of users and the health of their devices before they connect to your customer's applications, without an order. With flexible pay-as-you go pricing options, our program bills MSPs for enrolled users at the end of each month, making it easier for you to offer your clients flexibility without assuming risk.

Our automatic billing options and individual account reporting drives business productivity by freeing up your team to work on strategic projects and spend less time on billing processes.

Unified View and Management of All Customers

Improve your productivity and save time and resources managing your Duo customers through a comprehensive view of all customer accounts within a single management console.

With managed services for our Trusted Access solutions, you can add or remove accounts and seats, and delegate the right level of access to each account without compromising your customer's security.

End-to-End Business Support

Our program is designed to help MSPs easily include two-factor authentication and access controls within their service offerings. We provide assessment tools that allow you to run phishing campaigns to identify vulnerable users and devices in your customer environment in minutes and start protecting them right away.

Whether supporting you in your first install, helping you troubleshoot a customer problem, or providing you with documentation to help integrate Duo into one of your customer's applications, our team, and access to our extensive documentation library, are available to you any time, any where.
