

What our customers and partners are saying about us

The following reviews were gathered on [G2](#), the world's largest tech marketplace where businesses can discover, review, and manage the technology they need to reach their potential.

The reviews of Quadrotech's Migration software are unfiltered, unbiased, and 100% validated by G2. Read what our actual customers and partners are saying about us!

Archive Migration

Great cooperation during the migration!

Archive Migration, Quadrotech's Business partner

"We migrated 7 TB of data for one of our customer. The challenge was to just replace the shortcuts in the inbox of the user with the original email out of the enterprise vault archive. We planned it in a great cooperation and the accountability, cooperation & availability of the Quadrotech involved people was great!"

Migration of On Prem Enterprise Vault to M365 Exchange

Archive Migration, Warwick B, IT Manager

"The managed service was excellent, from setup to complete, very thorough.

We had 4tb of on Prem Enterprise Vault data, that we wanted to migrate back into 180 users mailboxes, now stored in Microsoft 365 exchange cloud. We wanted a solution which will take the data for us, move back to the same location as the vault stub, and remove the stub when complete.

Archive Shuttle was the product which did exactly that, and more. It was easy to install and setup, with the assistance of the consultant and at that point, our involvement was to supply a list of names which then just migrated at a good pace with no impact to our network or users. The process was invisible to our users."

Upfront and Honest

Archive Migration, Administrator in Hospital & Health Care

"They have been very quick to respond and the assigned engineer has been attentive. The software is fairly hands off so all I have to perform is the backend engineering to get Exchange set up to ingest. This created a way so that Exchange did not get hammered while EV was sending data to the new in place archives. The process so far has been very easy and the reporting has shown to keep us knowledgeable about what comes in and what goes out.

It's a great piece of software that takes the hassle out of trying to migrate from other archiving solutions. I really enjoyed working with it."

Best migration tool

Archive Migration, Sarath K, App Developer

"The best and user friendly migration tool. We can easily to migrate entire email system in to new platform by using quadrotech tool. We can transfer our emails securely to other platforms. The customer support is very helpful."

Made a potentially very complex migration simple

Archive Migration, Lead Solutions Consultant - Microsoft Solutions

"Quadrotech's products are designed by people who clearly understand the technology and the challenges faced when migrating from on-premises Exchange and Enterprise Vault to Office 365.

We used Quadrotech to migrate 18TB of Symantec Enterprise Vault content along with user mailboxes from Exchange to Office 365, as well as ingesting a couple TB of PST files. Their software turned what would have been a very complex and messy migration into a pretty seamless one. I found their professional services team are extremely knowledgeable and helpful."

Quadrotech mail archive export

Archive Migration, Executive Sponsor in Construction

"Quadrotech was able to export 30+ TB of mail data which we successfully ingested into a new platform. The export was key in a new ediscovery project that was tasked with our teams by the business.

I liked Quadrotech's ability to adapt to the challenge of the project. As we were exporting 10+ years of archive mail data from a legacy email archive system, we encountered numerous issues. Quadrotech was able to re-code and rewrite their platform to adapt to the issues in our system. Additionally, as the project became more challenging, Quadrotech continually stepped up to solve the many problems we encountered."

PST Migration

Fantastic Product, Fantastic People, Fantastic Company

Administrator in Financial Services, Enterprise(1001-5000 employees)

“Quadrotech took all the complexity of a huge project like a PST Migration and made it a completely guided process, with white glove service. All of our questions were answered thoroughly throughout the process, from pre-sales, to post-sale and the entire way through the project.

The engineers who were assigned to our project were extremely knowledgeable, patient, and really cared about the success of our project which had several red flags we felt were important to address. They addressed each concern individually, and were there each and every time we needed to address a concern.

Many products claim to do the same thing as Quadrotech, but Quadrotech is the only company we found that has the people and support behind the product in such a positive manner.”

Quadrotech's History

Founded in 2011, Quadrotech is an independent, privately-held software company headquartered in Zug, Switzerland, with teams located all around the world. We have a rich heritage as a migration software vendor, with years of experience migrating email archives, Exchange mailboxes, and PST files. Over the years our software has migrated roughly 16 PB of data, with an increasingly large portion of projects migrating data into Microsoft Office 365. In 2016, Quadrotech acquired an Office 365 Reporting, Analytics and Security software company called Cogmotive. This acquisition gave Quadrotech the opportunity to expand our software portfolio and breadth of expertise. Today, Quadrotech's solutions include migration into Office 365, cloud to cloud migrations, and advanced reporting, security, and management for Office 365. Learn more at www.quadrotech-it.com.
