

Cox Business® Work-at-Home Solutions

Commercial Services for Home Offices

When the world transforms overnight, it can drastically change the way you do business. Using our Work-at-Home Solutions, Cox Business is here to help you reimagine how your team connects with your customers. Starting with a separate, commercial-grade Internet connection, you get the workforce flexibility you need with the security, protection and cloud options to sustain a new way of doing business.

The Cox Business Advantage

Maximized by speed options from 50 Mbps to 1 Gbps and no data caps, your team can effortlessly transfer files, video conference and navigate emails without fighting for bandwidth with their families.

Business-Grade Security at Home

A WiFi-enabled Cox Business Internet Gateway installed with every package ensures your remote workers are protected from hackers, viruses, spyware and malicious websites by our McAfee-powered and MalBlock security solutions.

Robust Options

From cloud desktop and telephony options to the dynamic Microsoft 365 suite, our solutions make remote work feel like productive work.
