

# Enterprise Network Edge

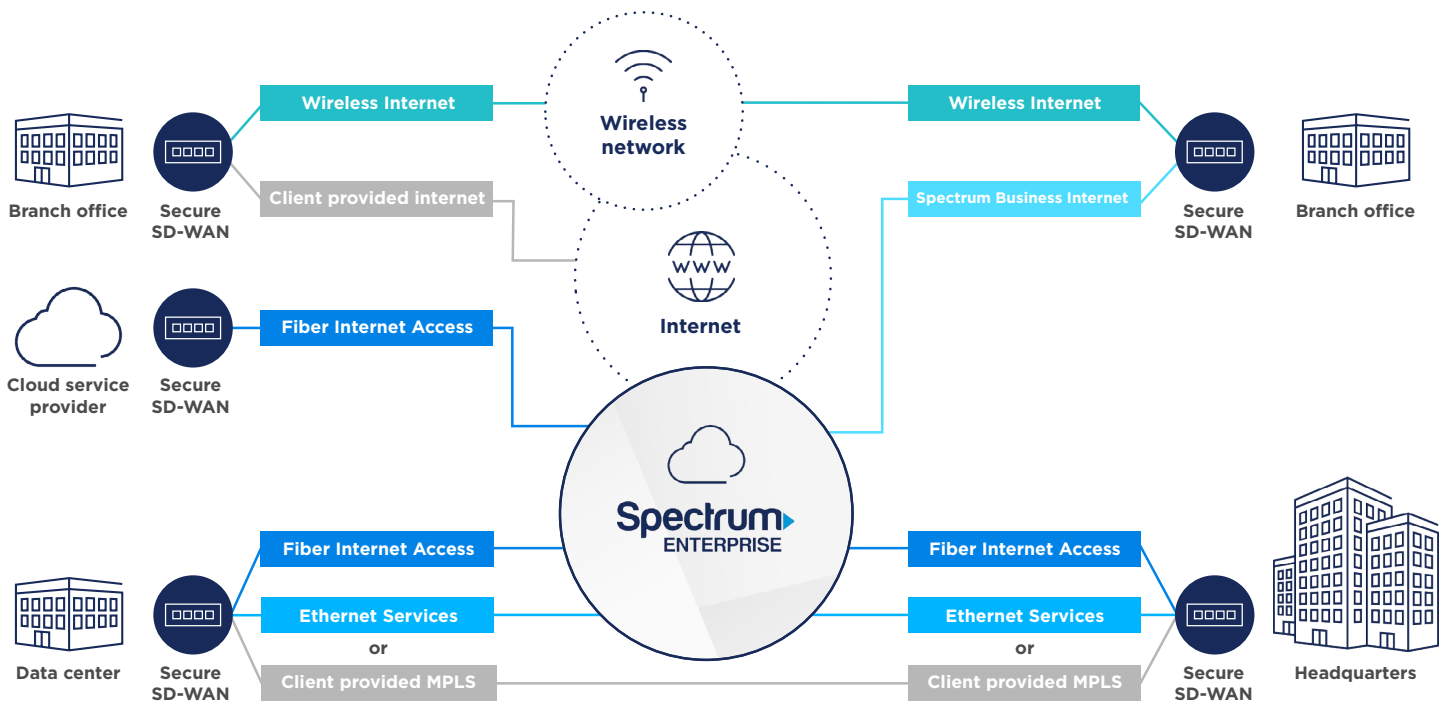

Providing secure, uncompromising performance as your network needs evolve.

Enterprise Network Edge gives large-scale organizations the ability to transition to a hybrid network architecture built around advanced SD-WAN technologies. Powered by Fortinet, Enterprise Network Edge offers access to multiple cloud instances and advanced security with throughput speeds up to 100 Gbps, while also supporting distributed workforces. This delivers a better digital experience for your teams and creates a flexible network that can quickly meet the evolving needs of your organization.

### Powerful, adaptable and fully supported: Enterprise Network Edge enhances the digital experience.

Enterprise Network Edge also supports single-site organizations that require high-capacity throughput speeds and low latency while keeping it all secure. No matter what your needs are, Enterprise Network Edge can support your most demanding applications. And as your trusted partner, Spectrum Enterprise will provide a consultative approach from design through implementation to ensure a smooth network transition.

**Enterprise Network Edge simplifies the transition to a hybrid architecture and creates a secure SD-WAN environment throughout your public network.**

### Product highlights

- **Scalable performance:** Adopt an SD-WAN solution with low latency, intelligent routing for critical applications and scalability for thousands of locations.
- **Designed for the cloud:** Connect to multiple cloud service providers simultaneously to create a seamless and secure user experience.
- **Enhanced security:** Incorporate firewalls and unified threat management (UTM) with provider-managed, integrated security from the edge to the cloud.
- **Remote work ready:** Enable remote workers to securely connect to your network with support for up to 50,000 people and no additional licenses to buy.
- **Flexible management:** Choose the level of management you desire, allowing your team to control what they want and consult with us for the rest.
- **Comprehensive control:** Gain visibility into performance, routing, SD-WAN configuration, firewall settings and other network components across locations with a centralized portal.
- **Multiple connectivity options:** We have the right connectivity and service-level agreement (SLA) to meet your needs, based on our national reach as a facilities-based provider.
- **Minimize expenses:** Create a secure, cost-effective SD-WAN solution with no infrastructure to purchase, no hardware to maintain and no vendor lock-in — all for one monthly cost.
- **Several deployment options:** Select the network architecture that best fits your needs — a public/private structure or transition to a fully public network over time.

### Key benefits

- Supports employee productivity across multiple locations and cloud connections for an exceptional digital experience.
- Gives employees across your organization consistent, high-performing access to the cloud applications that streamline workflows.
- Strengthens the security of your network with automated updates while supporting throughput speeds up to 100 Gbps.
- Extends your network resources to team members at home or on the road to facilitate collaboration and communication no matter their location.
- Minimizes time spent on network administration by giving your team a range of options — from co-managed to a fully managed solution.
- Offers instant visibility into network usage and performance of your public network for faster and better decision making.
- Expands your connection options with choices such as dedicated Fiber Internet Access, Ethernet Services, Spectrum Business Internet and Wireless Internet, or bring your own internet, Ethernet or MPLS.
- Lowers costs and creates efficiencies compared to MPLS and other private networks.
- Provides the ability to transition at your own pace while continuing to meet the needs of your organization.

### About Spectrum Enterprise

Spectrum Enterprise, a part of Charter Communications, Inc., is a national provider of scalable, fiber technology solutions serving many of America's largest businesses and communications service providers. The broad Spectrum Enterprise portfolio includes [networking and managed services solutions](#): [Internet access](#), [Ethernet access and networks](#), [Voice](#) and [TV solutions](#). The Spectrum Enterprise team of experts works closely with clients to achieve greater business success by providing solutions designed to meet their evolving needs. For more information, visit [enterprise.spectrum.com](https://enterprise.spectrum.com).
