

IT solutions to transform your organization

The Spectrum Enterprise fiber network is available for your business. Discover the power to transform your organization with scalable and reliable connectivity and communication solutions.

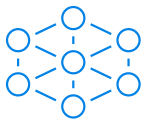

Internet

Empower your organization with reliable connectivity on a dedicated, high-performance fiber network.

Fiber Internet Access: Achieve dedicated internet connectivity with symmetrical upload and download speeds and bandwidth up to 100 Gbps.

Wireless Internet: Provide primary or secondary internet access over LTE Advanced technology with this all-inclusive wireless internet service.

Wireless Internet Backup: Prepare for the unexpected with a cost effective, automatic wireless internet failover and failback service that is managed for you.

WAN

An easier way to reliably connect your locations with complete end-to-end support.

Ethernet Services: Meet ever-growing data needs by connecting locations with a fast, reliable wide area network (WAN) solution backed by performance guarantees and built on a dedicated fiber infrastructure. Bandwidth up to 100 Gbps is available.

Cloud Connect: Extend your network with fast, secure and dependable private connections to cloud service providers.

Wavelength Services: Support your most demanding application needs with high-speed, dedicated WAN connectivity with bandwidth up to 100 Gbps.

Managed network services

Transform your network and simplify IT operations with expertise, service and support.

Enterprise Network Edge: Improve the network experience for your teams when scalability, performance and flexibility are paramount to your business. Powered by Fortinet, the solution simplifies IT operations by providing SD-WAN and security in a multi-cloud-ready platform that brings together connectivity, equipment and network management to support both hybrid networks and workforces.

Managed Network Edge: Simplify the deployment and management of your network with this modular, all-in-one solution. Delivered over the Cisco Meraki platform, Managed Network Edge offers security, routing, SD-WAN, WiFi, switching, cameras and the ability to work from anywhere there is an internet connection. Achieve flexibility, scalability with connectivity, equipment and network management from a single partner.

Managed Router Service: Efficiently route traffic and improve bandwidth use without investing in hardware or day-to-day management.

DDoS Protection: Guard against malicious volumetric attacks designed to overload your network with world-class distributed denial of service (DDoS) threat identification and mitigation.

Managed LAN

Enable operational efficiency with greater network availability.

Managed WiFi: Meet customer demands for reliable connections to the internet with ubiquitous coverage across your facilities and 24/7/365 support.

Voice and unified communications

Inspire the free flow of ideas and anywhere, anytime productivity with reliable, digital voice solutions.

Enterprise Trunking: Maximize the value of premises-based PBXs with reliable, cost-effective, feature-rich and easy-to-scale PRI and SIP trunking solutions.

Primary Rate Interface (PRI): Access a highly reliable voice trunk solution built on our extensive fiber network, and integrate a suite of management, reporting and business-continuity features to help maximize efficiency and keep you connected.

Session Initiated Protocol (SIP): Enhance your organization's competitiveness with reliable communications and cost-effective calling, together in customizable solutions for businesses of any size.

The right partner for your digital journey

Spectrum Enterprise has vast expertise, successfully guiding organizations throughout their digital journey. Whether you're expanding your team across locations, adopting emerging technology or looking for new ways to stay competitive, we've got you covered. Our vast portfolio of solutions is designed to keep you ahead by scaling and growing with you.
